## IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

1. (Currently Amended) A cosmetic, characterized in that it contains comprising an organopolysiloxane expressed by the following general formula (1)[.] {(CH<sub>3</sub>)<sub>3</sub>SiO}<sub>3</sub>SiCH<sub>3</sub> (1); and at least one other kind of organopolysiloxane than that expressed by the formula (1), wherein said other kind of organopolysiloxane [being] is not a crosslinked organopolysiloxane[s which are] prepared by addition polymerization in the presence of the organopolysiloxane expressed by the general formula (1) and thereby [to be] swollen with the organopolysiloxane expressed by the general formula (1) after polymerization.

## 2. (Cancelled)

- 3. (Original) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxane is liquid at 25°C and 1 atm.
- 4. (Original) The cosmetic as described in Claim 3, wherein said liquid organopolysiloxane is volatile at 25°C and 1 atm.

- 5. (Original) The cosmetic as described in Claim 4, wherein said volatile organopolysiloxane is a cyclic dimethylpolysiloxane having 4 to 6 silicon atoms.
- 6. (Original) The cosmetic as described in Claim 3, wherein said liquid organopolysiloxane is non-volatile at 25°C and 1 atm.
- 7. (Original) The cosmetic as described in Claim 6, wherein said non-volatile organopolysiloxane is at least one selected from the group consisting of dimethylpolysiloxanes and methylphenylpolysiloxanes.
- 8. (Original) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxane is of a form of paste, gum, elastomeric solid or non-elastomeric solid at 25°C and 1 atm.
- 9. (Original) The cosmetic as described in Claim 8, wherein said gum form of organopolysiloxane is dimethylpolysiloxane gum with a degree of polymerization ranging from 3,000 to 20,000.
- 10. (Original) The cosmetic as described in Claim 8, wherein said elastomeric solid form or non-elastomeric solid form of organopolysiloxane is dispersed in the cosmetic.
- 11. (Original) The cosmetic as described in Claim 10, wherein said non-elastomeric solid form of organopolysiloxane is polyalkylsilsesquioxane spherical powder.

- 12. (Currently Amended) The cosmetic as described in Claim 8, wherein said non-elastomeric solid form of organopolysiloxane is at least one selected from the group consisting of acryl silicone copolymers, fluorinated organopolysiloxanes, trimethylsiloxysilicates (i.e., MQ resins), and trimethylsiloxysilicates containing a dimethylsiloxy group. (i.e., MDQ resins)
- 13. (Original) The cosmetic as described in Claim 2, wherein said other kind of organopolylsiloxane is a modified organopolysiloxane.
- 14. (Original) The cosmetic as described in Claim 13, wherein said modified organopolysiloxane is at least one selected from the group consisting of fluorinated organopolysiloxanes, polyether-modified organopolysiloxanes, amino-modified organopolysiloxanes, organopolysiloxanes containing an alcoholic hydroxyl group, glyceryl-modified organopolysiloxanes, and polyglyceryl-modified organopolysiloxanes.
- 15. (Original) The cosmetic as described in Claim 1, wherein said other kind of organopolysiloxanes is a crosslinked organopolysiloxane.
- 16. (Original) The cosmetic as described in Claim 15, wherein said crosslinked organopolysiloxane is a reaction product of organopolysiloxane having at least two alkenyl groups per molecule with organohydrogenpolysiloxane having a Si-H bond.

- 17. (Original) The cosmetic as described in Claim 15, wherein said crosslinked organopolysiloxane has at least one moiety selected from the group consisting of polyoxyalkylene moieties, alkyl moieties, alkenyl moieties, and aryl moieties.
- 18. (Previously Amended) The cosmetic as described in Claims 15, wherein said crosslinked organopolysiloxane is contained in the cosmetic in a state swollen in an organopolysiloxane of a dynamic viscosity of 0.65 to 100 mm<sup>2</sup>/s.
- 19. (Previously Amended) The cosmetic as described in claim 1, wherein it further contains a fluorine-containing compound.
- 20. (Previously Amended) The cosmetic as described in claim 1, wherein it further contains a UV-ray protective component.
- 21. (Previously Amended) The cosmetic as described in claim 20, wherein said UV-ray protective component is at least one selected from the group consisting of titanium oxide fine particle, zinc oxide fine particle, 2-ethylhexyl paramethoxycinnamate, 4-tert-butyl-4' -methoxydibenzoylmethane, and benzophenone UV-ray absorbents.
- 22. (Previously Amended) The cosmetic as described in claim 1, wherein it further contains a compound having an alcoholic hydroxyl group.

- 23. (Previously Amended) The cosmetic as described in claim 1, wherein it further contains a thickening agent.
- 24. (Original) A cosmetic, characterized in that it contains an organopolysiloxane expressed by the following general formula (1)

 ${(CH_3)_3SiO}_3SiCH_3$  (1)

and at least one selected from the group consisting of fluorine-containing compounds, UV-ray protective components, compounds having an alcoholic hydroxyl group and thickening agents.

25. (New) The cosmetic as described in Claim 12, wherein said trimethylsiloxysilicates are MQ resins and said trimethylsiloxysilicates containing a dimethylsiloxy group are MDQ resins.
